ADMISSION.

For admission to the Freshman Class of the Classical Course, an examination must be well sustained in the following studies, or *their equivalents*:

Latin—Six books of the *Æneid*; three books of Caesar's Commentaries; five Orations of Cicero; Allen and Greenough's or Harkness's Grammar, including Prosody; Allen's or Harkness's Introduction to Latin Composition; Liddell's History of Rome, to Book IV.

Greek—Four books of Xenophon's *Anabasis*; two books of the *Iliad*; Goodwin's or Hadley's Greek Grammar, including Prosody; Writing Greek, with accents; Smith's History of Greece, to Book III.

Mathematics—Arithmetic, with Metric System; Algebra, to Equations of the Second Degree; the first five books of Wentworth's Geometry.

English, etc.—Proficiency in English Grammar and Analysis; each student must give evidence of ability to use the English language with correctness and propriety. A good practical knowledge of Modern Geography. A thorough knowledge of the outlines of American History.

Candidates for admission to the Freshman Class of the Scientific Course are examined as above, with the omission of Latin and Greek.

The regular examinations of candidates for admission will be held at the University on the Monday and Tuesday preceding Commencement, and on the Tuesday and Wednesday of the first week of the Fall Term of the College Year.

Special examinations will be held in October and June of each year, on application of the Board of Education, *at any school to which a Free Scholarship has been given*. At such times examination will be made of any applicant intending to pursue a regular course at the University on the *whole* or *any part* of the requirements for admission; and a certificate will be issued on such branches as are passed. This certificate, if presented within eighteen months, will entitle the holder to entrance without further examination on the branches certified to.

Whoever offers himself for examination thereby expresses his intention, if admitted, to enter the class for which he is examined.

Candidates for advanced standing will be examined in the studies previously pursued by the classes which they propose to enter. Candidates from other colleges will be required to present certificates of dismission in good standing.

GENERAL INFORMATION.

SITUATION.

The College is admirably situated in a region at once attractive and remarkable for healthfulness, with spacious grounds on a hill overlooking the pleasant and thriving village of Canton, the county seat of St. Lawrence county. With abundant facilities for recreation, the student is peculiarly free from undue distraction in his work, and is prompted to industry by every legitimate incentive. And while no place is absolutely free from evil to such as persistently seek it, the unavoidable temptations to vice and dissipation are here at a minimum, and are utterly discountenanced, not merely by the discipline of the school, but also by the general sentiment of the students and of the neighborhood.

TERMS.

The First Term begins on the Wednesday next preceding the last Sunday in August, and closes the day before Christmas.

The Second Term begins on the first Wednesday in February and continues until Commencement day, viz., the Wednesday next preceding July 4th, unless both occur the same week, in which case Commencement will be on the Wednesday of the next preceding week.

PRIZES.

RUSSELL PRIZES.

A prize of Twenty Dollars has this year been offered by the Hon. Leslie W. Russell, LL. D., to the member of the Freshman Class showing the greatest excellence in oratory; also, a second prize of Ten Dollars to the member of the same class standing next in proficiency.

RICH PRIZES.

Prizes for excellence in oratory are this year offered to members of the Sophomore Class by the Rev. William A. Rich, D. D., as follows: a first prize of Fifteen Dollars; a second prize of Ten Dollars; a third prize of Five Dollars. To be publicly competed for.

DETURS.

Prizes in money and books are given for special excellence in various branches of the College work.

EVENING LECTURES.

In addition to the lectures regularly given by members of the Faculty, during the present year a series of lectures will be delivered by prominent alumni, on the practical requisites and conditions of success in the various professions.

These lectures are open to the public.

LIBRARY.

All students in good standing are entitled, without extra charge, to the privileges of Herring Library, which contains upwards of nine thousand volumes, comprising all classes of subjects, and several thousand pamphlets, catalogued according to the most approved methods.

The library is opened daily. The pastors of all the churches in Canton are entitled, *ex officio*, to its privileges. The public may use it under certain conditions.

The library is contained in the Herring Library Hall, a substantial fire-proof building with a capacity of 60,000 volumes, erected by the late Silas C. Herring, Esq., of New York city. Although the library comprises many rare and valuable books, it has of late been but little extended; and its wants are manifold. Since the loss of the income formerly supplied by the generosity of Mr. Herring, withdrawn in consequence of his failure, the library has had for the purchase of books only the income of a fund of five hundred dollars, the gift of a friend who wishes for the present to remain unknown. A fund of ten thousand dollars is greatly needed.

READING ROOM.

A commodious and well furnished Reading Room, supported and controlled jointly by the students of both Departments of the University, is open at all hours of the day.

The leading American and English magazines and reviews, together with most of the popular religious, scientific, and secular periodicals and newspapers, are kept constantly on file.

By authority of the Executive Committee, each student of the University is required to pay, on or before October 1st, in each year, a fee of One Dollar for the support of the Reading Room, unless excused therefrom by the President of his school.

SCIENTIFIC COLLECTIONS.

The University has valuable geological and mineralogical collections, which are used in illustrating the instruction and lectures in those branches of study. These collections are for the present kept in Herring Library Hall.

GYMNASIUM.

A large hall in the basement of the main building has been devoted to the use of the Gymnasium Association, and is furnished with some of the most necessary apparatus.

EXPENSES.

TUITION.

The annual tuition fee for each student is thirty dollars. No reduction is made for absence, except in case of prolonged sickness.

BOARD.

Board can be had of the Steward at \$3.00 per week, washing included; or, if preferred, in private families at prices ranging from \$2.00 to \$4.00 per week.

BOOKS.

By special arrangements with publishers, books can be obtained at the University at cost for cash.

COLLEGE BILLS.

All College bills will be made out by the Treasurer; each bill will contain one-half the annual charges. Unless other and satisfactory arrangements are made with the Treasurer, the first bill will be delivered December 15th, and must be paid on or before February 10th; the second bill will be delivered one week before Commencement, and must be paid on or before September 15th; but the second bill of the Senior year must be paid at least one day before Commencement. Students who leave College before graduating must pay in full all College bills at the time of leaving.

FREE SCHOLARSHIPS.

The Trustees of the University have established the following Free Scholarships:

Four Scientific and four Classical Scholarships (one of each annually) to the Canton Union School, Canton; and to the Clinton Liberal Institute, Fort Plain.

Four Classical Scholarships (one annually) to the Union School, Massena; to the Union School, Waddington; and to the Ogdensburg Academy, Ogdensburg.

Two Scientific and two Classical Scholarships (one annually) to the Union School, Hermon; to Lawrenceville Academy, Lawrenceville; and to the Gouverneur Wesleyan Seminary, Gouverneur.

Four Scientific Scholarships (one annually) to the Village Schools of Madrid, Colton, Richville, Heuvelton, Russell and Morley.

These Scholarships are granted and established under the following conditions and regulations:

1. They may be granted to students of either sex, and shall be held to cancel all claims for tuition.

2. The candidate for a Scholarship shall declare his purpose to pursue a full course of four years in the University. In case any student shall, for any reason, abandon the course without completing it, unless excused by the President, he shall pay tuition in full for all the time he has attended the University under such Scholarship.

3. The candidate shall present to the President evidence of good moral character; shall be in good health, and pledged to study and observe the laws of health; and shall not be less than fifteen years old.

4. A willful violation of the Rules and Regulations of the University; the use of intoxicating liquors as a beverage; or any course of conduct unbecoming a young man or a young woman as a member of the University, shall be deemed by the President a sufficient reason to cancel said Scholarship. In case any student holding one of these Scholarships shall fail to maintain the requisite standing for continuance in the University, or from sickness, or any other cause, is absent for two successive terms from the regular exercises of his class, the Scholarship may be declared vacant by the President.

5. The Boards of Education of the several schools, to whom all applications should be made, shall have sole power to nominate candidates for these Scholarships. These Boards are restricted, however, to the nomination of such as are actually members of the schools which they represent. If two or more applications are made for the same scholarship it is recommended by the University that the nomination be made upon the result of a competitive examination, all other things being equal.

6. The candidate, upon receiving a nomination for a Free Scholarship from such Board, shall be required to pass, *without conditions*, an examination upon those branches required for entrance (see page 13) before becoming entitled to its provisions.

The TOWNSEND SCHOLARSHIP has been established by the First Universalist Church of Auburn. The holder of this Scholarship is nominated by the founder.

DEGREES.

Graduates in the Classical Course receive the degree of *Bachelor of Arts*.

Graduates in the Scientific Course receive the degree of *Bachelor of Science*.

ADVANCED DEGREES.

Bachelors of Arts of three years standing may take the degree of *Master of Arts*, and *Bachelors of Science* of three years standing may take the degree of *Master of Science*, on passing an examination on some literary or scientific course of study to the satisfaction of the Faculty. It is designed that these degrees shall represent real and solid attainments in scholarship, and the Faculty, whenever it may be deemed advisable, will call to their assistance Professors of other Colleges and other persons of acknowledged proficiency in the particular subjects involved.

The following are adequate courses of study to be pursued by candidates for the second degree:

LATIN.

1. The whole of Virgil and Horace, with Schmidt's Rhythmic and Metric (translated by Prof. J. W. White).

2. The whole of Tacitus, with Merivale.

3. Cicero's Tusculan Disputations (five books), De Natura Deorum and De Officiis, with the History of Ancient Philosophy.

4. Twelve comedies of Plautus and Terence, with Mommsen's History of Rome.

5. Latin Literature, with translations at sight of average passages from any of the leading authors, and an original thesis in Latin on some topic connected with the subject.

GREEK.

6. The Iliad and the Odyssey entire, with Comparative Mythology and Antiquities.

7. Ten tragedies from Aeschylus, Sophocles, and Euripides, with Schmidt's Rhythmic and Metric.

8. An equivalent amount from the Lyric, Didactic, Comic, and Bucolic Poets.

9. Five hundred pages of Plato, with a thorough study of his Philosophy and that of Socrates.

10. An equivalent amount from any of the Attic Orators, with the history of the period involved.

11. Thucydides entire, with Grote and Curtius on the Peloponnesian War.

12. Greek Literature, with translations at sight of average passages from any of the leading authors, and an original thesis in Greek upon some topic connected with the subject.

MODERN LANGUAGES.

13. Courses similar to 5 and 12 may be offered in any modern language other than English. A high degree of proficiency will be required.

ENGLISH LITERATURE.

14. Green's Short History of the English People, Arnold's Manual of English Literature, Marsh's Lectures on the English Language and Literature, Lanier's Science of English Verse, and a critical reading of the following: Ward's English Poets entire, or an equivalent amount of standard poetry; fifteen standard plays, at least ten of which shall be from Shakspere; Bacon's Essays, and an equal amount from the works of Addison, Burke, Macaulay, Emerson, Lowell, and five other standard prose writers (not novelists); and fifteen standard novels by first-rate authors not now living.

For any part of this course a *sound equivalent*, to be judged by the Faculty, may be substituted. But prose fiction, to a greater extent than above stated, will not be admitted; and in all cases thoroughness and good critical appreciation will be required.

PHILOSOPHY.

15. Mill's System of Logic; Hamilton's or Bowen's Logic; Fowler's Inductive Logic; Ueberweg's History of Philosophy; Hamilton's Metaphysics; Porter's The Human Intellect; Jowett's Plato; Bowen's Modern Philosophy.

Bascom's Ethics; McCosh's The Emotions; Jouffroy's Introduction to Ethics; Sidgwick's Methods of Ethics.

POLITICAL SCIENCE.

16. Smith's Wealth of Nations; Mill's Political Economy; F. A. Walker's Political Economy; F. A. Walker's The Wages Question; Bowen's or Cary's Political Economy; Roscher-Lalor's Political Economy; Cossa's or Blanqui's History of Political Economy.

Amos's Science of Law; Curtis's and Von Holst's Constitutional Histories of the the United States; The History of the English Constitution (Stubbs, and Hallam); Woolsey's Political Science; Lieber's Political Ethics; Wilson's Congressional Government.

Courses 15 and 16 may be combined under the direction of the President.

MATHEMATICS AND ASTRONOMY.

17. General Geometry and Calculus,—Peirce and Olney; Analytical Mechanics,—Bartlett and Tait; Theoretical and Practical Astronomy,—Watson, Chauvenet, Newcomb and Holden; supplemented by a careful reading of the papers published by the various societies devoted to Astronomy.

PHYSICS AND CHEMISTRY.

18. General Physics,—Descanel, Ganot; Electricity and Magnetism,—Maxwell, Gordon; Modern Applications of Electricity,—Hospitalier; Heat,—Maxwell, Tyndall.

19. Eliot and Storer's Manual of Inorganic Chemistry; Bloxam's Laboratory Teaching; Qualitative Analysis,—Douglass and Prescott, or Fresenius; Clowes's Elementary Treatise; the Article on Chemistry in the ninth edition of the Encyclopædia Britannica; Roscoe and Schorlemmer's Treatise on Chemistry.

NATURAL HISTORY.

20. Zoology: Claus and Sedgwick's Text-book; Brooks's Hand-book of Invertebrate Zoology; Parker's Zootomy; Works of Darwin and Spencer.

21. Botany: Sachs's Text-book; Goodale's Physiological Botany; Arthur, Barnes and Coulter's Plant Dissection; Gray's Manual.

22. Geology: Lyell, Geikie, Dana, LeConte. Mineralogy: Dana. Collections and Classifications.

HISTORY.

23. English History: Freeman's History of the Norman Conquest; Green's Larger History of England; Stubb's, Hallam's and May's Constitutional Histories.

24. American History: Bancroft, Hildreth, Parkman; Frothingham's Rise of the Republic; Curtis's History of the Constitution; Von Holst's or Schouler's Constitutional History of the United States; The Federalist.

Candidates are expected to present dissertations on topics in the fields of study which they have specially investigated.

Resident graduates who have completed an adequate course of study may be admitted to an examination for a second degree before the expiration of three years, if the Faculty deem it advisable.

Masters of Arts and *Masters of Science* may be examined for the degrees of *Doctor of Philosophy* and *Doctor of Science*; but such degrees will be conferred only after satisfactory proof of the faithful and successful prosecution of courses of study fully equal in extent and quality to those required for similar honors in the best Universities.

Notice of application for examination must be given to the President at least two months before Commencement. The fee for the diploma of the second degree is ten dollars, and of subsequent degrees thirty dollars, with the necessary expenses of examination, to be paid to the Treasurer by the twentieth day of June next preceding the annual meeting of the Board of Trustees at which action is to be taken.

ADMINISTRATION AND INSTRUCTION.

DISCIPLINE.

It is earnestly desired that the undergraduates may be influenced to good conduct and diligence by higher motives than fear of punishment. The sense of duty and honor, and the generous feelings natural to young men and women engaged in honorable pursuits, are appealed to as the best regulators of conduct; and the students are invited and expected to coöperate with the Faculty. It is the policy of the government to allow in all things as much liberty as will not be abused; but good order and discipline will be strictly maintained, and misconduct punished by adequate penalties. Frequenting bar-rooms, billiard-rooms, or saloons, is absolutely forbidden, and will be punished even by expulsion in aggravated cases.

Students are answerable for immoral conduct during vacation no less than in term-time.

PUBLIC WORSHIP.

Devotional exercises, consisting of prayer with reading of the Scriptures and singing, are conducted every morning in the College Chapel; and all students are required to attend.

Each student is required to attend regularly the Sunday services of the church of his choice.

EXAMINATIONS.

Thorough examinations, mainly in writing, are held at the close of each term, and no student will be passed on the work of the term until he has obtained a minimum grade of *six* (on a scale of *ten*) on each subject, and an *average of seven* on all the subjects prescribed for that term.

ABSENCES.

As regular attendance at all college exercises is of the utmost importance, absences will be excused only for good reasons, on petition.

When pecuniary necessity makes it unavoidable, a student wishing to teach may, on seasonable petition and by vote of the Faculty, be granted a leave of absence, not to exceed ten weeks in any one year, on condition of passing satisfactory examinations on all work done by his classes during his absence.

REPORTS.

Reports of the standing and conduct of each student are made to his parents or guardian twice each term by the President: hence, if a student falls behind in his studies or becomes disorderly, it is quickly known to those most interested.

METHODS OF INSTRUCTION.

No pains are spared to develop in the student right habits of study, thorough self-command, power of attention, accuracy, close observation, and independent judgment. He is constantly encouraged to original thought, and as constantly guided and restrained by judicious criticism. Especially in the treatment of the studies pursued in the Junior and Senior years, such as Psychology, Logic, Ethics, Political Economy, and International Law, propositions are not *dictated* but *demonstrated*, and full opportunity is given to the student to maintain his own opinions by suitable arguments. This system of patient oral drill is supplemented by a carefully prepared course of written reviews, with constant criticism; a method that has been found unsurpassed both for promoting clear thinking, and for enabling the student to attain a ready command of language for the accurate and effective expression of his thought. Due attention is given to style, and throughout the course the student is required to write themes and essays, subject to detailed criticism. Rhetorical drill is carefully attended to; and classes have been organized for parliamentary practice, extempore speaking, and debate: these classes are a new feature, and the system adopted already shows excellent results. In the treatment of English Literature, while the history of the subject is by no means neglected, especial attention is given to the study of *literature itself* by means of a carefully arranged course of critical reading: thoroughness is enforced by weekly examinations. In the study of the Languages, translation is made an effective, practical exercise in the skillful use of English: grammatical analysis, philological relations, etc., are not slighted, but the proper appreciation of the classics as literature, and the historical bearings of what is read, are particularly insisted on. In French and German opportunities will be given for conversation. In Mathematics, besides thorough drill in the class-room, ample opportunities will be given for *field practice* in surveying, etc., and first-rate apparatus will be furnished; special instructions will be given in free-hand drawing and draughting, including the construction of the various kinds of geometrical and topographical drawings, the design and construction of machinery and bridges, and the preparation of architectural plans. Physics and Chemistry are illustrated by profuse experiment; faithful work on the part of the student is insured by a series of written examinations, rigor-

ously inspected; opportunity for and instruction in laboratory work is offered to such as elect it. The instruction in Botany, Zoölogy, and Physiology, besides lectures and recitations, consists largely of practical work in the biological laboratory. A full course in General Biology is given, which includes dissection, microscopic work, and experimentation. This is followed by special work in Zoölogy and Botany. In Physiology frequent demonstrations are made; and instruction is given in hygiene.

Students desiring to do advanced work in any department will be encouraged and assisted, provided such work does not involve neglect of their regular studies.
